The status of English as a global language presents both opportunities and challenges. To begin with, its _____ (two words, l. ____) makes it an attractive language to learn and it is only logical that policymakers, therefore, have heavily _____ (l. ____) English lessons across Europe.

Yet, there is still an inherent disadvantage for non-native speakers of English. Especially in _____ (l. ____) settings, individuals are usually more convincing when they can use their mother tongue.

Such disparities are tricky to measure, but they matter in the academic community, where English is needed to secure _____ (l. ____) for projects and to gain recognition around the world.

In order to combat _____ (two words, l. ____), a number of remedies could be considered. One controversial suggestion is imposing a levy in countries in which most people speak English as their native language, and then _____ (l. ____) the funds in other countries for foreign-language instruction. An alternative approach to compensation might be the accelerated and more generous utilization of patent rights in non-English-speaking countries.
